Independent test results prove:

Spectra™ Curtain is No. 1

In an independent study conducted by the U.S. Army Environmental Hygiene Agency, Spectra Curtain came out on top in control of hazardous optical radiation.

The Army tested a representative cross section of all transparent welding curtains, including other oranges, but no other achieved the same high rating as Spectra Curtain.

VISIBILITY AND SAFETY CHARACTERISTICS OF COMMERCIALLY AVAILABLE TRANSPARENT WELDING CURTAINS.*

TYPE OF CURTAIN	RELATIVE VISIBILITY THROUGH CURTAIN (%)	TYPE OF WELDING PROCESS BEING USED			
		I FERROUS METAL PURE GAS Ar OR He	II ALUMINUM METAL PURE GAS Ar OR He	III FERROUS METAL MIXED GAS INCL CO_2, O_2, H_2	IV SMAW OR FCAW FLUX VAPOR
		AMPS	AMPS	AMPS	AMPS
Spectra Orange	69	1300	750	550	450
Gray	56	225	125	100	75
Green	63	150	90	70	50
Yellow	100	80	50	35	30
Blue	44	40	25	20	15

*Data based on maximum permissible arc current that is allowable for various types of welding processes for personnel more than two meters from the arc for an eight hour exposure period.

Specially patented, Spectra Curtain absorbs, scatters, and filters special emissions to create a safer and better working environment for the welder, and nearby coworkers and supervisors.

Spectra Curtain offers high visibility with greatest optical safety.

This chart from the study report shows that Spectra Curtain is first in all four welding process categories. Wilson has always known that Spectra Curtain is superior, but someone else just proved it.
